Tiffany Wong
Fall 2021: Homework 0

1 Exercises

1.1 Describe in 2-3 sentences what you expect to achieve from this course. Add this description as a PDF file into the archive that you will upload.

I always wanted to learn R, so this will be a really helpful opportunity for me to do so. Also, I learned about decision trees and entropy concepts in a previous course, but I want to learn how to properly apply them to datasets and real-life situations. One last thing is that I think learning from a professor who is actually in the technical field will be more beneficial for me in learning about how someone in the industry thinks.
